But death comes in the guise of hope when a genetically modified tomato created to feed the world combines with the government's new tactical virus, giving it an unexpected host and a mode of transport. Plague rises, giving the paranormal species the choice to stay hidden and allow humanity to die, or to show their true form and give a bid to save the human race. Under accusations of scientific misconduct, Trisk and Kal flee across a plague-ravaged United States to convince leaders of the major paranormal species to save their supposedly weaker kin. Not everyone thinks humanity should be saved, though, and Trisk must fight the prejudices of two societies to prove not only that humanity does something to offer but also that long-accepted beliefs against women, dark magic, and humanity itself can turn to understanding; that when people are at their worst, the best show their true strength; and that love can hold the world together as a new balance is found.

**Nimbus**

Book #1: *Empire of Dust*, Book #2: *Crossways*. In a galaxy where the super-powers are the megacorporations, and ambitious executives play fast and loose with ethics in order to secure resources, where can good people turn for help? The megacorporations control the jump gates and trade routes. They use psi-techs, implant-enhanced operatives with psionic abilities, who are bound by unbreakable contracts. Psi-tech Cara Carlinni once had her mind turned inside out by Alphacorp, but she escaped and found her place with the Free Company. Ben Benjamin leads the Free Company, based on the rogue space station, Crossways. The megacorporations have struck at Crossways once—and failed—so what are they planning now? Crossways can't stand alone, and neither can the independent colonies, though maybe together they have a chance. But something alien is stirring in foldspace. Something bigger than the squabbles between megacorporations and independents. Foldspace visions are supposed to be a figment of the imagination. At least, that's what they teach in flight school. Ben Benjamin knows it's not true. Meeting a void dragon was bad enough, but now there's the Nimbus to contend with. Until now, humans have had a free hand in the Galaxy, settling colony after colony, but that might change because the Nimbus is coming.

Books by Jacey Bedford:

**Nimbus**

When her crewmate, Danny, is murdered on the colony of Volynnia, Central Corps chief engineer, Commander Elena Shaw, is shocked to learn the main suspect is her lover, Trey Zajec. She knows Trey is innocent but with her when Danny was killed. So who is the real killer and why are the corps framing an innocent man? Retracing Danny's last hours, they discover that his death may be tied to a mystery from the past: the explosion of a Central Corps starship at a wormhole near Volynnia. For twenty-five years, the Central Gov has been lying about the tragedy, even willing to go to war with the outlaw PSI to protect their secrets. With the authorities closing in, Elena and Trey head to the wormhole, certain they'll find answers on the other side. But the truth that awaits them is far more terrifying than they ever imagined, a conspiracy deep within Central Gov that threatens all of human civilization.

**Remnants of Trust**

Six weeks ago, Commander Elena Shaw and Captain Greg Foster were court-martialed for their role in an event Central Gov denies ever happened. Yet instead of a dishonorable discharge or time in prison, Shaw and Foster are now back together on Galileo. As punishment, they've been assigned to patrol the nearly empty space of the Third Sector. But their mundane mission quickly turns treacherous when the Galileo picks up a stray call. It's a situation full of attack from raiders. A PSI generation ship—the same one that recently broke off negotiations with Foster—is also in the sector and joins in the desperate battle that leaves ninety-seven of Exeter's crew dead. An investigation of the disaster points to sabotage. And Exeter is only the beginning. When the PSI ship and Galileo suffer their own "accidents," it becomes clear that someone is setting off a war in the Third Sector to keep their secrets, and the clues point to the highest echelons of power and deep into Shaw's past.

**After the Crown**

Former gunrunner-turned-Empress Hail Bristol is reeling from both treacherous plottings and foreign invasion. Now, on the run from enemies on all fronts, Hail prepares to fight a full-scale war for her throne and her people, even as she struggles with the immense weight of the legacy thrust upon her. Books by Chris Brookes:

**Places in the Darkness**

Hundreds of miles above Earth, the space station Ciudad de Cielo is the beacon of hope for humanity's expansion into the stars. But not everyone aboard shares such noble ideals. Bootlegging, bonging, and prostitution form a lucrative underground economy for rival gangs, which the authorities are happy to turn a blind eye to until a disassembled corpse is found dancing in the micro-gravity. In charge of the murder investigation is Nikki "Fix" Freeman, who is not thrilled to have Alice Blake, an uptight government goody-two-shoes, riding shotgun. As the bodies pile up, and the partners are forced to question their own memories, Nikki and Alice begin to realize that gang warfare may not be the only cause for the violence.

**Terminal Alliance**

The Krakau came to Earth to invite humanity into a growing alliance of sentient species. However, they happened to arrive after a plague wiped out half the planet, turned the rest into near-untappable animals. The Krakau's first impulse was to turn around and go home. (After all, it's hard to have diplomatic relations with mindless savages who eat your shoes, riding shotgun. As the bodies pile up, and the partners are forced to question their own memories, Nikki and Alice begin to realize that gang warfare may not be the only cause for the violence.) Their second impulse was to try to fix us. Now, a century later, human beings might not be what they once were, but at least they're no longer trying to eat everyone. Marion "Mops" Adamopoulos is surprisingly bright (for a human). As a Lieutenant on the Earth Mercenary Corps Ship Pufferfish, she's in charge of the Shipboard Hunters.
